

Nebraska Public Service Commission

Broadband Survey

Released: February 2007

INTRODUCTION

A. Statutory Authority

Section 706 of the Federal Telecommunications Act of 1996 (the Act) established a national goal that the Federal Communications Commission (FCC) and each state commission with regulatory jurisdiction over telecommunications services shall encourage the deployment of advanced telecommunications capability to all Americans on a reasonable and timely basis.¹ This section of the Act also requires the FCC to report on the availability of advanced telecommunications capability to all Americans. Consistent with this provision the FCC tracks data on high-speed connections to the Internet in the United States and reports its findings to Congress on a regular basis. The most recent FCC report was issued on January 31, 2007 and reflects data as of June 30, 2006.²

Following the passage of the Act, the Nebraska Legislature gave the Nebraska Public Service Commission (Commission) the authority to implement the provisions of the Act in *Neb. Rev. Stat. § 86-122* (2004 Supp.).³ This authority is to be broadly construed in a manner consistent with the Act.⁴ Consistent with *Neb. Rev. Stat. § 86-323*, the Commission is also empowered to promote access to advanced telecommunications and information services in all regions of the state. The Commission has taken steps to gather more detailed and current information on the availability of broadband services in Nebraska.

B. Background

In early 2000, the Commission collaborated with the Iowa Utilities Board to co-host one of the field hearings for the regional Section 706 Federal-State Joint Conference on Advanced Services. The hearing was held in South Sioux City. Officials participating in the hearing included members of the Nebraska Public Service Commission, FCC Chairman William Kennard, Senator Bob Kerrey and commissioners from other states. At the field hearing, various panels gave testimony about the deployment of advanced services. Hearing participants also toured rural areas in the region to observe existing efforts to deploy advanced services.

In 2002, the Commission opened an investigation to monitor broadband deployment in Nebraska. The Commission released its initial broadband report and order in 2003, finding that based on the Nebraska Information Network (NIN) study reported to the Commission by the Nebraska Telecommunications Association (NTA), 82 percent of Nebraska exchanges had broadband infrastructure in place. In the study previously provided to the Commission for its 2003 report, of 597 communities counted, 41 percent of the communities listed had DSL available and 31 percent of the communities listed had cable modem available.

¹ 47 U.S.C. § 706.

² See FCC, *High-Speed Services for Internet Access: Status as of June 30, 2006*, Report by the Industry Analysis and Technology Division Wireline Competition Bureau (January 2006) (“FCC Status Report”), available at http://hraunfoss.fcc.gov/edocs_public/attachmatch/DOC-270128A1.pdf

³ Previously codified in *Neb. Rev. Stat. § 75-109*. In 2002, the Commission’s statutes regarding telecommunications regulation were re-codified in Chapter 86.

⁴ *Id.*

On November 3, 2004, the Commission issued an order in NUSF-26 finding that the policy of NUSF high-cost program support should continue to evolve as new technologies are deployed.⁵ The emphasis, the Commission found, should shift from the type of service offered to supporting comparable access, focusing on the capability of the underlying facilities. The Commission found a subsequent proceeding should be opened to adopt standards for deployment of advanced services and to determine whether NUSF high cost program support is needed to ensure access to these services.⁶

On January 18, 2006, the Commission issued an order to update the broadband information previously collected. A report based upon the information submitted by providers was accepted by the Commission on July 25, 2006. The report identified that all 93 Nebraska counties had Broadband Access (≥ 200 kbps) through at least one of the listed methods (cable modem, DSL, satellite, fixed wireless). In addition, the 535 incorporated places in Nebraska (as defined by the Nebraska Department of Economic Development) all had internet access at some speed and 488 had Broadband Access (≥ 200 kbps) through at least one of the listed methods.

C. Broadband Study Update

On September 23, 2006, after a workshop was held to investigate alternative methods of collecting data and how to account for the variances in geopolitical areas by which data is reported, the Commission issued an order to again update the broadband information previously collected. The Commission's order is attached as **Appendix A**. The Commission required telecommunications carriers eligible to receive universal service funding to respond to the data request and made a concentrated effort, using various methods and information sources, to identify other possible providers of internet access and included them in the data request.⁷ The responses ranged from no response, a response that they did not provide service in the state, a response that they were a reseller of another service provider, a response with data, or a response but did not provide data.

D. Description of Information Solicited and Provided

The FCC defines "advanced services" to mean services and facilities producing 200 kilobits per second (kbps) upstream and downstream transmission speed or greater. For the purposes of the Commission's broadband investigation, the Commission adopted this definition for what is considered advanced service capability. In today's market however, broadband transmission speeds available are often much higher than the 200 kbps threshold. As the appendices to this report indicate, broadband services can be delivered through cable technologies, copper and fiber facilities, as well as fixed wireless, mobile wireless (EvDO), and satellite technology. In this report the Commission adopted the FCC classifications of internet access:

Speeds ≤ 200 kbps in both directions is classified as "Internet Access."

Speeds ≥ 200 kbps in at least one direction is classified as "High Speed Access."

⁵ See Application No. NUSF-26, *In the Matter of the Nebraska Public Service Commission, on its own motion, seeking to establish a long-term universal service funding mechanism*, Findings and Conclusions, ¶ 34 (November 3, 2004).

⁶ See *id.*, ¶ 85.

⁷ **Appendix D** shows the companies responding to the survey.

Speeds ≥ 200 kbps in both directions is classified as "Advanced Services"

The Commission sought information on broadband and high-capacity transmission services by carrier disaggregated by geopolitical boundaries. Depending upon (a) the type of service being reported and (b) the method used by the provider in their records. The geopolitical boundary reported may have been Rate Center, Zip Code, or population center name based. Carriers were asked to specify the speeds at which each service was delivered, the type of transmission facility, the price, the number of potential households in each area that can be served, and the number of subscribers in each area. Survey data contained in this report was filed by carriers during the September 12, 2006 through October 12, 2006 comment period. The information included in the attachments is based wholly on the survey responses provided directly by the carriers.

Appendices B and C contain the Survey Instructions and the Survey Instrument used in the collection of data for this report.

Much of the data collected is considered confidential and proprietary by the carriers and the Commission. Accordingly, some of the information collected is not provided in this report. The information included in the report is provided on an aggregated basis where necessary and not broken out by specific company to comply with confidentiality requirements.

E. Summary of Information Reported

The last Broadband Survey collected data on 535 population centers and the data indicated that 488 (91.6%) of those population centers had Broadband access (≥ 200 kbps in both directions) to the internet. In this report, the change to using population centers associated with ZIP codes resulted in data being collected on 577 population centers and that data indicates that 542 (93.9%) of the 577 population centers have Broadband access to the internet.

Service providers were asked to submit information about the recurring rate for each of the services offered. An analysis of the data shows that there continues to be a convergence of prices for High Speed services.

Service Type	Average cost for High Speed
Cable	\$38.77
DSL	\$41.94
Satellite	\$60.45
Fixed Wireless	\$41.30

Table 1 below provides a summary of the reported data at a county level by internet access speeds and type of transport. A county was considered to have a particular access level if one or more broadband service providers reported providing that level of service. The table also shows the total number of counties in which the five different technologies were available. **Table 2** provides a similar report of access at the population center level.⁸

Appendix E and **Appendix F** show detailed information summarized in Table 1 and 2 respectively.

The information in this report should not be interpreted to suggest that residents outside incorporated places lack access to broadband service. As might be expected residents inside of population centers usually have access to either cable or DSL. Residents outside of population centers typically rely on satellite or fixed wireless for access.

The data collection methods used for this report were developed utilizing input provided at the industry workshop held on August 22, 2006. Each industry that provides a method of internet access (local exchange carriers, cable service, fixed wireless, cellular, and satellite) was able to report on a geopolitical definition (rate center, population center, ZIP code) that was typically used in their industry. It was hoped that this method would provide better granularity in the data. However, that was not the case.

From a local telephone service provider perspective we are still faced with the fact that many rate centers cover more than one county and the serving central office may in fact provide DSL in an adjacent county. The current survey instrument makes it very difficult to accurately report those situations.

This method of data collection still does not accurately account for the service provided to the 394,788 residents of Nebraska that live outside of a population center.

Staff will be investigating an alternative method of obtaining data to be used in maintaining the broadband report in the future. Currently all facilities-based broadband providers are required to submit Form 477 to the FCC every March 31 and September 30 for the first and last six months of the year respectively. The data being submitted contains comparable data and is already at the zip code level.

⁸ In compiling the broadband survey responses the Commission used the population centers associated with the United States Postal Service ZIP Code list for the State of Nebraska. The 2005 population/status of each population center was then obtained from the Nebraska Department of Economic Development's (DED) table entitled *Population of Nebraska Incorporated Places and Nebraska Towns and Places (Current and Historic)*. See <http://info.neded.org/stathand/bsect5c.htm> and the series <http://info.neded.org/stathand/parttwo/townsa-b.htm> through <http://info.neded.org/stathand/parttwo/townst-z.htm>

Table 1

Summary of Data at a County Level			
	Type of Access	Number of Counties	% of Total Counties
Counties with			
Advanced Services (>200 kbps both Up AND Down)		93	100%
High Speed Access (>200 kbps either Up OR Down only)		72	77.4%
Internet Access (<200 kbps both UP and DOWN)		5	5.4%
Types of Access by Speed			
Advanced Services (>200 kbps both Up AND Down)			
	Any Type	93	
	Cable Modem	37	39.8%
	DSL	92	98.9%
	Satellite	93	100.0%
	Fixed Wireless	61	65.6%
	EvDO	2	2.2%
High Speed Access (>200 kbps either Up OR Down only)			
	Any Type	72	
	Cable Modem	1	1.4%
	DSL	30	41.7%
	Satellite	22	30.6%
	Fixed Wireless	4	5.6%
	EvDO	59	81.9%
Internet Access (<200 kbps both Up AND Down)			
	Any Type	5	
	Cable Modem	-	0.0%
	DSL	5	100.0%
	Satellite	-	0.0%

Table 2

Summary of Data at Population Centers (PC) Level					
	Type of Access	Number of PCs	Population of PCs	% of Total PCs	% of Population in PCs
Population Centers (PCs) in Nebraska used in report		577	1,364,999	100%	100%
Population Centers with some type of access		551	1,362,650	95.5%	99.8%
Advanced Services (>200 kbps both Up AND Down)					
	Any Type	542	1,360,814	93.9%	99.7%
	Cable Modem	65	900,755	11.3%	66.0%
	DSL	417	1,339,299	72.3%	98.1%
	Satellite	493	1,318,752	85.4%	96.6%
	Fixed Wireless	180	612,648	31.2%	44.9%
	EvDO	2	645,998	0.3%	47.3%
High Speed Access (>200 kbps either Up OR Down only)					
	Any Type	214	1,121,395	37.1%	82.2%
	Cable Modem	1	274	0.2%	0.0%
	DSL	66	769,890	11.4%	56.4%
	Satellite	75	106,623	13.0%	7.8%
	Fixed Wireless	7	22,094	1.2%	1.6%
	EvDO	135	1,073,073	23.4%	78.6%
Internet Access (<200 kbps both Up AND Down)					
	Any Type	5	484,633	0.9%	35.5%
	Cable Modem	0	-	0.0%	0.0%
	DSL	5	484,633	0.9%	35.5%
	Satellite	0	-	0.0%	0.0%
	Fixed Wireless	0	-	0.0%	0.0%
	EvDO	0	-	0.0%	0.0%

SECRETARY'S RECORD, NEBRASKA PUBLIC SERVICE COMMISSION

BEFORE THE NEBRASKA PUBLIC SERVICE COMMISSION

In the Matter of the Nebraska) Application No. C-2831/NUSF-51
Public Service Commission, on) /PI-67
its own motion, seeking to) PROGRESSION ORDER NO. 2
investigate telecommunications) ORDER RELEASING DATA REQUEST
infrastructure development in)
Nebraska.) Entered: September 12, 2006

BY THE COMMISSION:

O P I N I O N A N D F I N D I N G S

The Nebraska Public Service Commission (Commission) initiated this docket on its own motion on November 5, 2002, to investigate telecommunications infrastructure development in Nebraska. The Commission has periodically surveyed carriers on the pace of broadband deployment most recently by the order issued on January 18, 2006, that required all eligible telecommunications carriers to complete a broadband survey and electronically file the survey responses with the Commission. In reviewing the data submitted, and by comments made at the workshop, there is a strong belief that the data submitted, for various reasons, does not constitute a complete picture of broadband deployment in the state of Nebraska. It appears particularly incomplete in rural areas. In this Order, the Commission seeks to update the requested information on the development of broadband¹ technology in Nebraska to provide a more accurate picture.

In this Order, the Commission requires all regulated entities to respond to its data request. The Commission also strongly encourages all non-regulated entities to respond to this inquiry so that the Commission can collect and report complete and accurate information.

The Commission intends to release company contact information in addition to information on the various methods responding parties use to offer Internet access. It is also our intent to make available to consumers the geographical areas within which service providers offer their services. Confidential treatment will be granted to carriers wishing to keep trade secret information from being released. However, we may wish to release price range information not attributable to

¹ The Commission uses the term broadband to describe services that provide the subscriber with transmission speeds in excess of 200 kbps in each direction.

SECRETARY'S RECORD, NEBRASKA PUBLIC SERVICE COMMISSION

Application No. C-2831/NUSF-51/PI-67

Page 2

any particular carrier for certain groups of products or services.

All responding service providers must use the MS Excel spreadsheet and follow the associated instructions both of which can be downloaded from the Nebraska Public Service Commission web site (<http://www.psc.state.ne.us/>) to provide their responses. This step is critical to ensure the data can be correctly loaded into the database and naming anomalies will not occur in the submitted data. A list of solicited information is appended as Attachment A to this Order and is fully incorporated herein.

All data responses to the Commission's inquiry should be filed on or before the close of business **October 3, 2006**. All service providers subject to Commission regulatory oversight shall either file the requested data using the MS Excel spreadsheet or file a statement that they do not provide service for which data is being sought in any area. Persons filing information must file by electronic mail to Communications@psc.ne.gov. Confidential information should be clearly marked.

O R D E R

IT IS THEREFORE ORDERED by the Nebraska Public Service Commission that information in the above-captioned docket be refreshed as provided herein.

IT IS FURTHER ORDERED that data responsive to the Commission's inquiry must be provided on or before October 3, 2006. Commenters shall file (1) electronic copy of their comments. Confidential information shall be clearly marked.

IT IS FURTHER ORDERED that all providers subject to the Commission's regulatory oversight shall either file the requested data using the MS Excel spreadsheet or file a statement that they do not provide service for which data is being sought in any area.

SECRETARY'S RECORD, NEBRASKA PUBLIC SERVICE COMMISSION

Application No. C-2831/NUSF-51/PI-67

Page 3

MADE AND ENTERED at Lincoln, Nebraska this 12th day of September 2006.

NEBRASKA PUBLIC SERVICE COMMISSION

COMMISSIONERS CONCURRING:

//s// Lowell C. Johnson
//s// Frank E. Landis

Chairman

ATTEST:

Executive Director

Attachment A

In the MS Excel spreadsheets on the Commission's website, the Commission seeks data on the following:

For each community, or area served, provide the following information with respect to both residential and business users:

a. For DSL based access:

- 1) Name of Service Provider under which access is offered
- 2) Name of Rate Center where service is offered
- 3) Speed: Maximum Upload speed available from customer premise in kilobits per second (kbps)
- 4) Speed: Maximum Download speed available to customer premise in kilobits per second (kbps)
- 5) Number of Subscribers Service Provider has in service area
- 6) Number of Subscribers who could potentially obtain the DSL Service.

b. For Cable Modem based access:

- 1) Name of Service Provider under which access is offered
- 2) Name of Rate Center or Zip Code where service is offered
- 3) Speed: Maximum Upload speed available from customer premise in kilobits per second (kbps)
- 4) Speed: Maximum Download speed available to customer premise in kilobits per second (kbps)
- 5) Number of Subscribers Service Provider has in service area
- 6) Number of Subscribers who could potentially obtain the Cable Modem Service.

c. For Fiber based access

- 1) Name of Service Provider under which access is offered
- 2) Name of Rate Center where service is offered
- 3) Speed: Maximum Upload speed available from customer premise in kilobits per second (kbps)
- 4) Speed: Maximum Download speed available to customer premise in kilobits per second (kbps)
- 5) Number of Subscribers Service Provider has in service area
- 6) Number of Subscribers who could potentially obtain the Fiber Service.

d. For Evolution Data Optimized (EvDO) based access

- 1) Name of Service Provider under which access is offered
- 2) Name of Rate Center where service is offered
- 3) Speed: Maximum Upload speed available from customer premise in kilobits per second (kbps)
- 4) Speed: Maximum Download speed available to customer premise in kilobits per second (kbps)
- 5) Number of Subscribers Service Provider has in service area

e. For Fixed Wireless based access

- 1) Name of Service Provider under which access is offered
- 2) Name of City/Town/Village where service is offered
- 3) Speed: Maximum Upload speed available from customer premise in kilobits per second (kbps)
- 4) Speed: Maximum Download speed available to customer premise in kilobits per second (kbps)
- 5) Number of Subscribers Service Provider has in service area

f. For Satellite based access

- 1) Name of Service Provider under which access is offered
- 2) Name of City/Town/Village where service is offered
- 3) Speed: Maximum Upload speed available from customer premise in kilobits per second (kbps)
- 4) Speed: Maximum Download speed available to customer premise in kilobits per second (kbps)
- 5) Number of Subscribers Service Provider has in service area

g. Service Offerings - For each service offering provide the following information. Information submitted under this section will be considered confidential and proprietary.

- 1) Name of Service Provider under which access is offered
- 2) Method of Transport (DSL, Cable Modem, Fiber, EvDO, Fixed Wireless, Satellite) used to provide service
- 3) Sales or Marketing Name provider associates with this specific Service
- 4) Maximum Upload speed available from customer premise in kilobits per second (kbps) for listed service
- 5) Speed: Maximum Download speed available to customer premise in kilobits per second (kbps) for listed service

- 6) The Service Type will automatically be determined based upon the upload/download speeds provided
- 7) Non-Recurring rate per unit of term for the service listed
- 8) Recurring rate per unit of term for the service listed
- 9) Term of service in months

h. Consumer Contact Information

- 1) Name of Service Provider under which access is offered
- 2) Mailing Address
- 3) City
- 4) State
- 5) Zip Code
- 6) Telephone Number
- 7) Toll Free Number
- 8) EMail Address
- 9) Web Site URL
- 10) List of all Rate Centers where DSL service is offered
- 11) List of all Rate Centers or Zip Codes where Cable Modem service is offered
- 12) List of all Rate Centers where Fiber service is offered
- 13) List of all City/Town/Villages where Fiber service is offered
- 14) List of all City/Town/Villages where Fixed Wireless service is offered
- 15) List of all City/Town/Villages where Satellite service is offered

Detailed instructions are also posted on the website for providers to follow. Questions regarding the MS Excel Spreadsheets should be directed to Don.Gray@psc.ne.gov.

C-2831 Survey Instrument Instructions

Overview

Using the lessons learned from reviewing and loading the broadband survey data provided in response to the Commissions January 18th data request, and feedback provided by participants at the August 22nd workshop, a new survey instrument and instructions are being provided for the data request made in C-2831 Progression Order 2 released September 12, 2006.

The new survey instrument separates the data request for reporting the availability of Internet access from the reporting of commercial information on the actual service offerings. This should simplify the reporting issues, reduce the amount of data reported, and increase the accuracy of the information.

In previous data request the relationship of the service area, method of transport, and core business of the service provider was not accounted for in the development of the survey instrument. To address this we are providing individual worksheets in the workbook for each of the transport methods used to deliver Internet access, and where appropriate providing alternate methods of identifying the service area for the same transport method.

By utilizing a preformatted MS Excel workbook with individual worksheets for each type of service offering, and providing predefined drop down lists for critical data elements, the level of effort to provide the requested data should be reduced while increasing the overall accuracy of the data collected.

To prevent double counting of “customers” Internet Service providers should complete the “service address” and “potential customers” columns in the survey if they provide and control the transport facilities used by the customer to access their service. If customers of an Internet service provider must use the transport facilities of another service provider to gain access to the Internet service provider, then the Internet service provider should enter leave the “service address” and “potential customers” columns blank.

MS Excel File Structure

To make the entry and retrieval of data as easy as possible each service provider will submit all of the necessary information in a pre-formatted MS Excel file that has been provided by the NPSC. Only one service provider per file DO NOT aggregate multiple service providers into one file.

Worksheets

Each MS Excel file to be submitted by a service provider contains multiple worksheets to allow the entry of data for each specific type of transport technology.

The following worksheets have been created for reporting Internet access information by technology:

DSL by Rate Center
Cable Modem by Rate Center
Cable Modem by Zip Code
Fiber Optic by Rate Center
EvDO by Rate Center
Fixed Wireless by Service Area
Satellite by Service Area

A separate worksheet has been created for reporting the various service offerings a service provider may have.

Service Information

To enable the PSC to develop a database of service providers offering Internet Access a worksheet to gather the necessary information has been created:

Consumer Contact Information

The final visible tab is the Distribution List this data request was sent to. In reviewing the list if you see a facilities based service provider that is not listed please notify us so we can contact the party as soon as possible.

Data Entry

To enable the use of standardized data in this report the following data fields use a pull-down list for data entry.

Rate Center based upon the North American Numbering Plan Administrator's list of Nebraska 308 and 402 area code rate centers.

Zip Code based upon the August 2006 United States Postal Service list of Zip Codes for Nebraska including "unique" Zip Codes (dedicated businesses locations), and "not acceptable" city Zip code listings.

Service Area based upon the City / Town / Village listings used in the August 2006 United States Postal Service list of Zip Codes.

Transport Type a pre-defined list of transport methods that will be used in the reporting process.

Some data fields will be automatically populated based upon data entered in other fields. A shaded cell indicates fields with calculated values that are also protected to prevent changes. Calculated fields are:

Cable Modem by Zip Service Area and County will be populated based upon the Zip Code entered.

Fixed Wireless and Satellite County will be populated based based upon Service Area entered.

Service Information Service Type will be calculated based upon the Upload / Download speeds entered.

Data Entry Tips

By moving your mouse pointer over the name of a data field in the first row of each worksheet tips on data entry will be visible.

Data Validation

One of the problems encountered in the last data request was a situation where the Upload / Download speeds appeared to have been entered backwards. To alert a Service Provider to this possibility the Speed:MaxUp and Speed:MaxDown fields have been conditional formatted. Entering an Upload speed that is greater than the Download speed will cause the cell to be shaded in red and the data in the cell to appear in red. You are not prevented from entering the data this way, only alerted to the fact that it is a “non-standard” offering.

Step by step Data Entry Instructions

File Name

Save the MS Excel file using the name of the organization the data request was sent to. This will aid us in tracking the receipt of information.

DSL Worksheet

Service Provider enter the name you are known to your customers as. This name should be entered on each line of data.

Rate Center from the pull down list provided select each Nebraska rate center in which you provide DSL service

Speed:MaxUp enter the maximum upload speed in kilobits per second (kbps) you can offer using DSL technology. If your service area is such that some subscribers cannot utilize the maximum speeds because of distance then list that group of customers as a separate line entry.

Speed:MaxDown enter the maximum download speed in kilobits per second (kbps) you can offer using DSL technology. If your service area is such that some subscribers cannot utilize the maximum speeds because of distance then list that group of customers as a separate line entry.

Total Number of Service Addresses because DSL is associated with telecommunications list the number of service addresses your company provides telephone service to. If you are listing multiple lines of data because of different speed capabilities this number would be repeated in each line.

Potential Service Subscribers list the number of service addresses that are capable of subscribing to the listed upload / download speeds.

Cable Modem Worksheets

Some service providers may want to report Cable Modem service based upon Rate Center Designation and others by Zip Code. Use either method but please use only one method per responding company.

Cable Modem by Rate Center Worksheet

Service Provider enter the name you are known to your customers as. This name should be entered on each line of data.

Rate Center from the pull down list provided select each Nebraska rate center in which you provide DSL service

Speed:MaxUp enter the maximum upload speed in kilobits per second (kbps) you can offer using Cable Modem technology. If your service area is such that some subscribers cannot utilize the maximum speeds because of distance or equipment limitations then list that group of customers as a separate line entry.

Speed:MaxDown enter the maximum download speed in kilobits per second (kbps) you can offer using Cable Modem technology. If your service area is such that some subscribers cannot utilize the maximum speeds because of distance or equipment limitations then list that group of customers as a separate line entry.

Total Number of Service Addresses it is our understand that in the cable industry this is usually known as “homes passed”. If you are listing multiple lines of data because of different speed capabilities this number would be repeated in each line.

Potential Service Subscribers list the number of service addresses that are capable of subscribing to the listed upload / download speeds.

Cable Modem by ☐ip

Service Provider enter the name you are known to your customers as. This name should be entered on each line of data.

Zip Code from the pull down list provided select each Zip Code in which you provide Cable Modem service.

Service Area will be automatically populated based upon the Zip Code entered.

County will be automatically populated based upon the Zip Code entered.

Speed:MaxUp enter the maximum upload speed in kilobits per second (kbps) you can offer using Cable Modem technology. If your service area is such that some subscribers can not utilize the maximum speeds because of distance or equipment limitations then list that group of customers as a separate line entry.

Speed:MaxDown enter the maximum download speed in kilobits per second (kbps) you can offer using Cable Modem technology. If your service area is such that some subscribers can not utilize the maximum speeds because of distance or equipment limitations then list that group of customers as a separate line entry.

Total Number of Service Addresses it is our understand that in the cable industry this is usually known as “homes passed”. If you are listing multiple lines of data because of different speed capabilities this number would be repeated in each line.

Potential Service Subscribers list the number of service addresses that are capable of subscribing to the listed upload / download speeds.

Fiber

This worksheet is intended to capture those locations deploying “fiber to the home” or “fiber to the curb”. It is not intended for those service areas where fiber is some part of the transport that then uses a digital carrier system and/or a pure copper loop to deliver the “final mile”. It is believed that at this time a fiber-based service is offered only by telecommunications based service providers and therefore the service area will be based upon rate centers.

Service Provider enter the name you are known to your customers as. This name should be entered on each line of data.

Rate Center from the pull down list provided select each Nebraska rate center in which you provide DSL service

Speed:MaxUp enter the maximum upload speed in kilobits per second (kbps) you can offer using fiber technology. If your service area is such that some subscribers cannot utilize the maximum speeds because of equipment limitations then list that group of customers as a separate line entry.

Speed:MaxDown enter the maximum download speed in kilobits per second (kbps) you can offer using fiber technology. If your service area is such that some subscribers cannot utilize the maximum speeds because of equipment limitations then list that group of customers as a separate line entry.

Total Number of Service Addresses because fiber is typically associated with telecommunications list the number of service addresses your company provides telephone service to. If you are listing multiple lines of data because of different speed capabilities this number would be repeated in each line.

Potential Service Subscribers list the number of service addresses that are capable of subscribing to the listed upload / download speeds.

Evolution Data Optimized

This worksheet is intended to capture those service providers deploying wireless internet access using Evolution Data Optimized (EvDO) technology. It is believed that at this time EvDO is only being offered as part of a CMRS offering and therefore the service area will be based upon rate centers.

Service Provider enter the name you are known to your customers as. This name should be entered on each line of data.

Rate Center from the pull down list provided select each Nebraska rate center in which you provide DSL service

Speed:MaxUp enter the maximum upload speed in kilobits per second (kbps) you can offer using EvDO technology.

Speed:MaxDown enter the maximum download speed in kilobits per second (kbps) you can offer using EvDO technology.

Total Number of Service Addresses for this offering only the current number of customers is captured.

Fixed Wireless

Service Provider enter the name you are known to your customers as. This name should be entered on each line of data.

Service Area from the pull-down list provided select the city/town/ name that describes the service area the Fixed Wireless is offered in.

County will be automatically populated based upon the Service Area entered.

Speed:MaxUp enter the maximum upload speed in kilobits per second (kbps) you can offer using Fixed Wireless technology.

Speed:MaxDown enter the maximum download speed in kilobits per second (kbps) you can offer using Fixed Wireless technology.

Total Number of Service Addresses for this offering only the current number of customers is captured.

Satellite

Service Provider enter the name you are known to your customers as. This name should be entered on each line of data.

Service Area from the pull-down list provided select the city/town/ name that describes the service area the Satellite service is offered in.

County will be automatically populated based upon the Service Area entered.

Speed:MaxUp enter the maximum upload speed in kilobits per second (kbps) you can offer using Satellite technology.

Speed:MaxDown enter the maximum download speed in kilobits per second (kbps) you can offer using Satellite technology.

Total Number of Service Addresses for this offering only the current number of customers is captured.

Service Information

In this worksheet, for each method of transport you offer, please list all of the various service offerings you provide to your customers. Each data line should stand on its own with all entries completed.

Service Provider enter the name you are known to your customers as. This name should be entered on each line of data. You can copy and paste this information if you like.

Transport Method from the pull down list provided select the appropriate method of transport used to connect the customer premise and the router.

Service Name enter the trade / brand name used to list or advertise this offering to your customer e.g.; Extreme Speed I, Torch Lite 3, etc.

Speed:MaxUp enter the maximum upload speed in kilobits per second (kbps) a customer can obtain under this specific offering.

Speed:MaxDown enter the maximum download speed in kilobits per second (kbps) a customer can obtain under this specific offering.

Service Type this data will be automatically determined based upon the values entered in Speed:MaxUp and Speed:MaxDown.

Advanced Services = Up AND Down > 200 kbps

High Speed = Either Up OR Down >200 kbps

Internet Access = Both Up AND Down <200 kbps =

Rate:Non Reoccurring Any one time fees paid by the customer to initiate the specific service offering being described.

Rate:Reoccurring the monthly fee associated with the specific service offering being described.

Rate:Term the minimum length of the contract in months for the reoccurring rate given.

Consumer Contact Information

This information will be used in the database being developed by the Commission to provide basic information about service providers in a specific geographic area when consumers make inquiries.

Service Provider Name - enter the name you are known to your customers as or are listed in directories as.

Mailing Address the mailing address used for customer contact.

City, State, Zip associated with the mailing address.

Telephone Number list the telephone number new customer should call to obtaining detailed information about your service offerings.

Toll Free Number if you provide a toll free number for new customers list it here.

E-Mail Address if you have an e-Mail address for customer contact list it here.

Web Site if you have a web site with information about your service offering list it here.

For each of the listed transport types (DSL, Cable Modem by Rate Center, Cable Modem by Zip, Fiber, EvDO, Fixed Wireless, Satellite) use the pull-down list to identify which service areas you provide service in.
